Lurker Demo Application API Reference

This is an autogenerated documentation stub. You can edit it in:
`lurker/LurkerAppRails42.service.md`

user listing

```
GET /api/v1/users
```

This is an autogenerated documentation stub. You can edit it in: `lurker/api/v1/users-GET.md`

Response Example

```json
[
  {
    "id": 1,
    "name": "razum2um",
    "surname": "Marley"
  }
]
```

Request Schema

- additionalProperties: false
- limit
    - Required: no
    - Type: string
    - Example: "1"

Response Schema

- Type: array
- Items
    - Required: no
    - additionalProperties: false
    - id
        - Required: no
        - Type: integer
        - Example: 1
    - name
        - Required: no
        - Type: string
        - Example: "razum2um"
    - surname
        - Required: no
        - Type: string
        - Example: "Marley"

user creation

```
POST /api/v1/users
```

This is an autogenerated documentation stub. You can edit it in: `lurker/api/v1/users-POST.md`

Response Example

```
{
  "id": 1,
  "name": "Bob"
}
```

Request Schema

- additionalProperties: false
- user
  - Required: no
  - additionalProperties: false
  - name
    - Required: no
    - Type: string
    - Example: "Bob"

Response Schema

- additionalProperties: false
- id
  - Required: no
  - Type: integer
  - Example: 1
- name
  - Required: no
  - Type: string
  - Example: "Bob"

user deletion

```
DELETE /api/v1/users/:id
```

This is an autogenerated documentation stub. You can edit it in:
`lurker/api/v1/users/__id-DELETE.md`

Response Example

```
{}
```

Request Schema

- additionalProperties: false
- id
    - Required: no
    - Type: integer
    - Example: `1`

Response Schema

- additionalProperties: false

user

```
GET /api/v1/users/:id
```

This is an autogenerated documentation stub. You can edit it in:
`lurker/api/v1/users/__id-GET.md`

Response Example

```
{
  "id": 1,
  "name": "razum2um",
  "surname": "Marley"
}
```

Request Schema

- additionalProperties: false

Response Schema

- additionalProperties: false
- id
    - Required: no
    - Type: integer
    - Example: `1`
- name
    - Required: no
    - Type: string
    - Example: `"razum2um"`
- surname
    - Required: no
    - Type: string
    - Example: `"Marley"`

user updating

```
PATCH /api/v1/users/:id
```

This is an autogenerated documentation stub. You can edit it in:
`lurker/api/v1/users/__id-PATCH.md`

Response Example

```
{
  "id": 1,
  "name": "Bob",
  "surname": "Marley"
}
```

Request Schema

- additionalProperties: false
- id
  - Required: no
  - Type: integer
  - Example: 1
- user
  - Required: no
  - additionalProperties: false
  - name
    - Required: no
    - Type: string
    - Example: "Bob"

Response Schema

- additionalProperties: false
- id
  - Required: no
  - Type: integer
  - Example: 1
- name
  - Required: no
  - Type: string
  - Example: "Bob"
- surname
  - Required: no
  - Type: string

- Example: "`Marley`"

repo listing

```
GET /api/v1/users/:user_id/repos
```

This is an autogenerated documentation stub. You can edit it in:
`lurker/api/v1/users/__user_id/repos-GET.md`

Response Example

```json
[
  {
    "id": 1,
    "name": "lurker",
    "user_id": 1
  }
]
```

Request Schema

- additionalProperties: false
- limit
  - Required: no
  - Type: integer
  - Example: 1

Response Schema

- Type: array
- Items
  - Required: no
  - additionalProperties: false
  - id
    - Required: no
    - Type: integer
    - Example: 1
  - name
    - Required: no
    - Type: string
    - Example: "lurker"
  - user_id
    - Required: no
    - Type: integer
    - Example: 1

repo creation

```
POST /api/v1/users/:user_id/repos
```

This is an autogenerated documentation stub. You can edit it in:
`lurker/api/v1/users/__user_id/repos-POST.md`

Response Example

```
{
  "id": 1,
  "name": "new-gem",
  "user": {
    "id": 1,
    "name": "razum2um",
    "surname": "Unknown"
  }
}
```

Request Schema

- additionalProperties: false
- user_id
  - Required: no
  - Type: string
  - Example: 1
- repo
  - Required: no
  - additionalProperties: false
  - name
    - Required: no
    - Type: string
    - Example: "new-gem"

Response Schema

- additionalProperties: false
- id
  - Required: no
  - Type: integer
  - Example: 1
- name
  - Required: no
  - Type: string

- Example: `"new-gem"`
- `user`
  - Required: no
  - additionalProperties: false
  - `id`
    - Required: no
    - Type: integer
    - Example: `1`
  - `name`
    - Required: no
    - Type: string
    - Example: `"razum2um"`
  - `surname`
    - Required: no
    - Type: string
    - Example: `"Unknown"`

repo descruction

```
DELETE /api/v1/users/:user_id/repos/:id
```

This is an autogenerated documentation stub. You can edit it in:
`lurker/api/v1/users/__user_id/repos/__id-DELETE.md`

Response Example

```
{}
```

Request Schema

- additionalProperties: false

Response Schema

- additionalProperties: false

repo

```
GET /api/v1/users/:user_id/repos/:id
```

This is an autogenerated documentation stub. You can edit it in:
`lurker/api/v1/users/__user_id/repos/__id-GET.md`

Response Example

```
{
  "id": 1,
  "name": "lurker",
  "user_id": 1
}
```

Request Schema

- additionalProperties: false

Response Schema

- additionalProperties: false
- id
  - Required: no
  - Type: integer
  - Example: 1
- name
  - Required: no
  - Type: string
  - Example: "lurker"
- user_id
  - Required: no
  - Type: integer
  - Example: 1

repo updating

```
PATCH /api/v1/users/:user_id/repos/:id
```

This is an autogenerated documentation stub. You can edit it in:
`lurker/api/v1/users/__user_id/repos/__id-PATCH.md`

Response Example

```
{
  "id": 1,
  "name": "updated-name",
  "user_id": 1
}
```

Request Schema

- additionalProperties: false
- id
  - Required: no
  - Type: string
  - Example: 1
- user_id
  - Required: no
  - Type: string
  - Example: "razum2um"
- repo
  - Required: no
  - additionalProperties: false
  - name
    - Required: no
    - Type: string
    - Example: "updated-name"

Response Schema

- additionalProperties: false
- id
  - Required: no
  - Type: integer
  - Example: 1
- name
  - Required: no
  - Type: string

- Example: `"updated-name"`
- user_id
    - Required: no
    - Type: integer
    - Example: `1`

failed repo updating

```
PATCH /api/v1/users/:user_id/repos/:id-failed
```

This is an autogenerated documentation stub. You can edit it in:
`lurker/api/v1/users/__user_id/repos/__id-failed-PATCH.md`

Response Example

```
{
  "errors": {
    "name": [
      "can't be blank"
    ]
  }
}
```

Request Schema

- additionalProperties: false
- id
  - Required: no
  - Type: string
  - Example: 1
- user_id
  - Required: no
  - Type: string
  - Example: "razum2um"
- repo
  - Required: no
  - additionalProperties: false
  - name
    - Required: no
    - Type: string
    - Example: ""

Response Schema

- additionalProperties: false
- errors
  - Required: no
  - Example: 1
  - additionalProperties: false
  - name

- Required: no
- Type: array
- Items
  - Required: no
  - Type: string
  - Example: `"can't be blank"`

user updating

```
PATCH /api/v2/users/:id
```

This is an autogenerated documentation stub. You can edit it in:
`lurker/api/v2/users/__id-PATCH.md`

Response Example

```
{
  "id": 1,
  "name": "razum2um",
  "surname": "Unknown"
}
```

Request Schema

- additionalProperties: false
- user
  - Required: no
  - additionalProperties: false
  - name
    - Required: no
    - Type: string
    - Example: "Bob"
  - surname
    - Required: no
    - Type: string
    - Example: "Marley"

Response Schema

- additionalProperties: false
- id
  - Required: no
  - Type: integer
  - Example: 1
- name
  - Required: no
  - Type: string
  - Example: "razum2um"
- surname
  - Required: no
  - Type: string

- Example: `"Unknown"`

user updating

```
PATCH /api/v3/users/:id
```

This is an autogenerated documentation stub. You can edit it in:
`lurker/api/v3/users/__id-PATCH.md`

Response Example

```
{
  "id": 1,
  "name": "razum2um",
  "surname": "Unknown"
}
```

Request Schema

- additionalProperties: false
- user
  - Required: no
  - additionalProperties: false
  - name
    - Required: no
    - Type: string
    - Example: "Bob"
  - surname
    - Required: no
    - Type: string
    - Example: "Marley"

Response Schema

- additionalProperties: false
- id
  - Required: no
  - Type: integer
  - Example: 1
- name
  - Required: no
  - Type: string
  - Example: "razum2um"
- surname
  - Required: no
  - Type: string

- Example: `"Unknown"`
